Professional Summary

Quality Assurance, AI Engineering, Customer Success, and Product Operations professional with experience at a fast-moving startup that scaled from 0 to \$2M ARR. I've worked on testing features, identifying bugs early, and supporting smooth product releases, while also handling customer issues and setting up support processes as the product grew. I use AI and prompt engineering to build testing pipelines, automate workflows, and speed up how teams ship. I enjoy working in fast-paced environments where I can take ownership and solve real problems.

Experience

QA & AI Engineer (Product & Operations)

Aug 2024 - Present

Commenda

Bengaluru, KA

- Handled all QA at an early-stage startup where nothing was defined yet. Figured out what to test, how to test it, and worked with engineering, design, and product to make sure releases were solid.
- Used prompt engineering with Cursor, Claude Code, Stably.ai, Polarity, and Narrative AI to write test scripts, generate edge-case scenarios, and build CI/CD pipelines on GitHub Actions that ran regression tests automatically on every PR.
- Brought customer first response time down from 5 hours to under 5 minutes by setting up an automated response system.
- Built an SLA dashboard and worked with ops to set up customer support workflows from scratch, so we could actually track how things were going.

Business Analyst

Jan 2023 - Aug 2024

Cedcoss Technologies

Lucknow, UP

- Used Hotjar and Microsoft Clarity to understand how users were actually using the product and where things were falling off.
- Worked across dev, marketing, and ops to improve features and make sure what we shipped matched what clients needed.
- Handled direct communication with US-based clients through meetings and chat. Kept product docs and CRM tools (Zoho, Freshsales, Freshdesk) up to date for the team.

Quality Assurance, Trainee

Jun 2022 - Dec 2022

Monotype

Noida, UP

- Ran full user flow testing before releases, including manual testing and code inspections to catch issues early.
- Worked within agile/scrum teams and used Loom to record findings and share test cases with the rest of the team.

Education

PSIT College Of Higher Education

Kanpur, UP

Bachelor of Computer Applications (BCA)

Aug 2019 - Aug 2022

- Studied IT, system analysis, and business management. Graduated with an A+ grade.

Projects

Manojo - Content Aggregation Platform

2022

- * Designed the full UI in Figma for a YouTube content aggregation app. Planned out user flows and information structure, and did market research to make sure it was something people would use.

Skills

Key Skills: Quality Assurance, Manual/User Acceptance Testing (UAT), Regression Testing, Functional Testing, API Testing, SDLC, Agile Methodologies, UI/UX Testing, SaaS Product Operations, Process Optimization, Stakeholder Communication, AI Engineering, Prompt Engineering, AI-Assisted Testing, Test Automation.
